## Subject Index

Abrasions	
effect of in corrosion	4-8-9
hard-facing alloys for abrasive conditions	4-10-12
Acicular ferrite steels, specific types	
Mn-Mo-Cr	
Arctic linepipe applications	3-46-47
development	3-42-43
mechanical properties	3-43-44
microstructure	3-44-46
properties after quenching and tempering	3-50-52
Acoustic emission testing	
detection of leaks	1-19-20
in fatigue cracking	1-10-12
in flaw location	1-13-15
in H <sub>2</sub> embrittlement cracking	1-9-10
in rising load tests	1-12-13
prediction of structural failure	1-8-16
to locate defects in buried pipe	1-17-21
Aerospace structures	
use of steels	2-59-64
Air melting of maraging steels	4-56-60
Aircraft engines	
development of materials	2-55-59
Aircraft problems	
abnormal wear	1-39
cracks	1-35-38
cylinders	1-33-35
failure analysis	1-33-39
H <sub>2</sub> embrittlement	1-38-39
nose gear forks	1-33
welds	1-35
Aluminum	
effect on creep of ferritic steels	4-51-56
Aluminum alloys	
dome height measurement	3-55-59
forming limit curves	3-57
influence of lateral drawing-in	
stretchability	3-54-61, 64
transverse constraints	3-59-60
Austenitic manganese steel parts	
hard-facing alloys for build-up	4-10-11
Austenitic manganese steels	
for crushers and grinders	4-29-30
properties	4-30-31
selection of proper steel	4-32-33
wear tests	4-32
Bearings	
for rolling cutter rock bits	4-17
Biaxial stretch of sheet metal parts	2-16
Bits for percussion drilling	4-27-28
Blind shaft drilling	4-24
Boron effect on creep of ferritic steels	4-50-51, 53, 56
Brass	
dome height measurement	3-55-59
forming limit curves	3-57

influence of lateral drawing-in on stretchability . . . . .	3-54-61, 64	Emissivity in steel powder compacts during sintering . . . . .	2-37-42
transverse constraints . . . . .	3-59-60	Energy	
Carbide spheroidization		in steel industry . . . . .	2-1-2-2
effect on magnetic properties of steels . . . . .	1-62-64	transportation of fuel . . . . .	2-6-7; 2-9-10
Carbon		use of coal . . . . .	2-3-5
effect on emissivity of steel powder compacts during sintering . . . . .	2-39-42	Extension steel equipment for percussion drilling . . . . .	4-26-27
effect on surface discoloration of Ni alloys . . . . .	2-53-54	Failure	
Carburizing steels		in aircraft . . . . .	1-33-39
case characteristics . . . . .	3-1-2	of welds . . . . .	1-35
characteristics of the core . . . . .	3-3-4	Failure analysis procedures	
effect of Ni . . . . .	3-1-8	analysis of data . . . . .	2-35-36
fracture toughness . . . . .	3-8	background data . . . . .	2-23-33
grain refinement . . . . .	3-7-8	chemical analysis . . . . .	2-34
Fe-Ni studies . . . . .	3-4	electron microprobe analysis . . . . .	2-35
martensite response to tempering . . . . .	3-4-6	electron microscopy . . . . .	2-35
matrix behavior . . . . .	3-6	material properties . . . . .	2-34
retained austenite . . . . .	3-2-3	metallographic examination . . . . .	2-34-35
solid solution strengthening . . . . .	3-6-7	microfractography . . . . .	2-34
Case characteristics of carburizing steels . . . . .	3-1-2	report . . . . .	2-36
Chemical analysis in failure analysis . . . . .	2-34	simulations . . . . .	2-35
Chuckers		visual examination . . . . .	2-33-34
future . . . . .	2-25-31	x-ray techniques . . . . .	2-35
Coal		Fatigue in cylinders . . . . .	1-33-35
in steelmaking . . . . .	2-3-5	Fatigue-crack growth retardation in Al	
new developments . . . . .	2-3-5	alloys . . . . .	1-40-48
reserves . . . . .	2-3	Fatigue cracking	
use . . . . .	2-5	acoustic emission testing . . . . .	1-10-12
Cold working in steel sheets . . . . .	3-27-28	Ferritic stainless steels	
Composition of ferritic stainless steels . . . . .	3-32	Crucible 26-1	
Computers used in ultrasonic testing . . . . .	1-1-8	applications . . . . .	3-40-41
Cooling curves in quenched steels . . . . .	2-61-62	composition . . . . .	3-32
Core characteristics in carburizing steels . . . . .	3-3-4	corrosion resistance . . . . .	3-32-34
Corrosion . . . . .	4-1-3	intergranular corrosion . . . . .	3-32-38
in cracks . . . . .	1-35-38	mechanical properties . . . . .	3-39-40
of stainless steels . . . . .	4-3-9	oxidation resistance . . . . .	3-38
Corrosion resistance		physical properties . . . . .	3-39
of ferritic stainless steels . . . . .	3-32-38	pitting and crevice corrosion . . . . .	3-34-36
of grinding balls . . . . .	4-46	stress corrosion cracking . . . . .	3-37-38
Cost of steel sheets . . . . .	3-19-20	weldability . . . . .	3-38
Cracks due to corrosion . . . . .	1-35-38	Ferritic steels	
Creep		effect of P, Sb, Sn, and B on creep of	
of ferritic steels . . . . .	4-50-56	Cr-Mo type . . . . .	4-50-51, 53, 55
of Ti alloys . . . . .	1-50-54	effect of Sb, P, Sn, and Al on creep of	
Crevice corrosion		Cr-Mo-V type . . . . .	4-51-56
of ferritic stainless steels . . . . .	3-34-36	Flaw location	
of stainless steels . . . . .	4-5-6	acoustic emission testing . . . . .	1-13-15
Crushers of austenitic Mn steels . . . . .	4-29-30	Formability of steel sheets . . . . .	3-16-17
Cutting tools		Fracture	
for chuckers . . . . .	2-26-27	estimation of stress intensity . . . . .	1-9
future . . . . .	2-25-31	Fracture toughness	
future for lathe type production . . . . .	2-25-31	effect of quenching in steels . . . . .	2-59-64
materials of the future . . . . .	2-31	in carburizing steels . . . . .	3-8
Cylinders		Fuel	
fatigue due to overheating . . . . .	1-33-35	LNG carriers . . . . .	2-6-7
Data analysis in failure analysis . . . . .	2-35-36	LPG carriers . . . . .	2-6-7
Deep drawing of sheet metal parts . . . . .	2-15-16	transportation by tubes and pipes . . . . .	2-9-10
Design of gears . . . . .	4-49	transportation of . . . . .	2-6-7
Die designs of sheet metal parts . . . . .	2-16	Gears	
Diffusion molding of Ti alloys . . . . .	3-62-64	comparison of hardened gears . . . . .	4-49
Distortion of gears . . . . .	4-48	design . . . . .	4-49
Dome height		distortion . . . . .	4-48
limiting . . . . .	3-58-59	residual stress . . . . .	4-48
measurement in Al alloys . . . . .	3-55-57	single-tooth induction hardening . . . . .	4-46-49
measurement in brass . . . . .	3-55-57	Gleeble hot tensile test	
measurement in steels . . . . .	3-55-57	application to plant practices . . . . .	2-46-48
Ductility		for superalloys . . . . .	2-43-46
in steel sheets . . . . .	3-23	Grain refinement in carburizing steels . . . . .	3-7-8
of stainless steels . . . . .	2-18-20	Grinders of austenitic Mn steels . . . . .	4-29-30
Dynamic deformation of steel sheets . . . . .	3-14-16	Grinding balls . . . . .	4-35-36
Electrochemical etching of grids on sheet metal parts . . . . .	2-11-12	Grinding balls, specific types	
Electron microprobe analysis in failure analysis . . . . .	2-35	cast iron	
Electron microscopy in failure analysis . . . . .	2-35	corrosion resistance . . . . .	4-46

martensitic white-Fe balls . . . . .	4-42-43	Lateral drawing-in influence on stretchability . . . . .	3-54-61, 64
pearlitic white-Fe balls . . . . .	4-42		
wear resistance . . . . .	4-44-45		
Grinding media		Lathe production machines	
defects . . . . .	4-39-41	future . . . . .	2-25-31
effect of C . . . . .	4-34	Linear imperfections in steel wires . . . . .	1-21-25
effect of Cr . . . . .	4-34	Magnetic properties of steels . . . . .	1-62-64
effect of Cu . . . . .	4-35	Maraging steels	
effect of Mn . . . . .	4-34	development of air melted, sand cast	
effect of Mo . . . . .	4-34-35	alloys . . . . .	4-56-60
effect of Ni . . . . .	4-35	Martensite	
effect of Si . . . . .	4-35	response to tempering in carburizing	
results of survey . . . . .	4-33-34	steels . . . . .	3-4-6
Grinding rods . . . . .	4-37-39	Martensitic sheet steels . . . . .	3-28-30
Hard-facing alloys		Matrix in carburizing steels. . . . .	3-6
for abrasive conditions . . . . .	4-10-11	Mechanical properties	
for austenitic Mn steel parts . . . . .	4-10-11	of acicular ferrite steels . . . . .	3-43-44
for steel machinery parts . . . . .	4-10-11	of Al alloys . . . . .	2-22
nonferrous alloys . . . . .	4-10-11	of ferritic stainless steels . . . . .	3-39-40
relation of microconstituents and		of steel sheets . . . . .	3-12-13
composition with mineral hardness . . . . .	4-12-15	of pearlite-reduced steels . . . . .	3-47
selection . . . . .	4-10-11	of sheet metal parts . . . . .	2-14-15
WC . . . . .	4-10-11	Metallography	
High-strength cold-rolled (HSCR) steel sheets		in failure analysis . . . . .	2-34-35
cold working . . . . .	3-27-28	in measurement of retained austenite . . . . .	1-55-61
martensitic sheet steels . . . . .	3-28-30	Metallurgy of rolling cutter rock bits . . . . .	4-17-18
partial annealing . . . . .	3-28	Microfractography in failure analysis . . . . .	2-34
precipitation strengthening . . . . .	3-25-27	Microstructure	
solid-solution strengthening . . . . .	3-23-25	of acicular ferrite steels . . . . .	3-44-46
strength controlling factors . . . . .	3-9-10	of pearlite-reduced steels . . . . .	3-47-49
strength-ductility relationships . . . . .	3-23	of superalloys . . . . .	2-48-49
High-strength cold-rolled (HSCR) steel sheets, specific types		of Ti alloys . . . . .	1-51-54
Cb Grades—YS-W . . . . .	3-11	Mining industry	
anisotropy of mechanical properties . . . . .	3-12-13	application of roller cutter bits . . . . .	4-15-25
applications . . . . .	3-20	corrosion of stainless steels . . . . .	4-1-9
cost reduction . . . . .	3-19-20	Nickel	
dynamic deformation properties . . . . .	3-14-16	Fe-Ni studies . . . . .	3-4
formability . . . . .	3-16-17	in carburizing steels . . . . .	3-1-8
mechanical properties . . . . .	3-12	Nickel alloy	
spot weldability . . . . .	3-17-19	effect of C on Monel 400 . . . . .	2-53-54
LTA Grades . . . . .	3-11	surface discoloration during vacuum	
anisotropy of mechanical properties . . . . .	3-12-13	furnace brazing of tubing . . . . .	2-51-54
applications . . . . .	3-20	Non-linear imperfections in steel wires . . . . .	1-27-30
cost reduction . . . . .	3-19-20	North Sea	
dynamic deformation properties . . . . .	3-14-16	use of steel in oil and gas installations . . . . .	2-8
formability . . . . .	3-16-17	Nose gear forks	
mechanical properties . . . . .	3-12	fatigue failure . . . . .	1-33
spot weldability . . . . .	3-17-19	Oxidation resistance of ferritic stainless	
PQ Grades . . . . .	3-11-12	steels . . . . .	3-38
anisotropy of mechanical properties . . . . .	3-12-13	Passivity . . . . .	4-3
applications . . . . .	3-20	Percussion drilling	
cost reduction . . . . .	3-19-20	bits . . . . .	4-25-26
dynamic deformation properties . . . . .	3-14-16	extension steel equipment . . . . .	4-26-27
formability . . . . .	3-16-17	integral rods . . . . .	4-26
mechanical properties . . . . .	3-12	multi-use rods . . . . .	4-26
spot weldability . . . . .	3-17-19	Phosphorus effect on creep of ferritic steels . . . . .	4-50-56
Ti Grades—YS-T . . . . .	3-10-11	Physical properties	
anisotropy of mechanical properties . . . . .	3-12-13	of Al alloys . . . . .	2-22
applications . . . . .	3-20	of ferritic stainless steels . . . . .	3-38
cost reduction . . . . .	3-19-20	Pipes and piping	
dynamic deformation properties . . . . .	3-14-16	acoustic emission analysis to locate	
formability . . . . .	3-16-17	defects in buried pipe . . . . .	1-17-21
mechanical properties . . . . .	3-12	detection of leaks . . . . .	1-19-20
spot weldability . . . . .	3-17-19	for transporting fuel . . . . .	2-9-10
Hot working temperatures for superalloys . . . . .	2-46-48	Pits	
Hydrogen embrittlement in aircraft failure . . . . .	1-38-39	imperfections in steel wires . . . . .	1-28-30
Hydrogen embrittlement cracking		Pitting of stainless steels . . . . .	3-34-36; 4-5-6
acoustic emission technology . . . . .	1-9-10	Precipitation strengthening in steel sheets . . . . .	3-25-27
Impact resistance of grinding balls . . . . .	4-45-46	Quenching	
Induction hardening of gears . . . . .	4-46-49	effect on fracture toughness in steels . . . . .	2-59-64
Intergranular corrosion of stainless steels . . . . .	3-32-34; 4-6-7	of acicular ferrite steels . . . . .	3-50-52
Internal pressure in forming of superplastic		Raise drilling . . . . .	4-24
alloys . . . . .	1-31-32	Residual stresses of gears . . . . .	4-48
Iron		Rising load tests	
Fe-Ni studies . . . . .	3-4	acoustic emission testing . . . . .	1-12-13
		Rivets of stainless steels . . . . .	2-18-20

Rods for percussion drilling . . . . .	4-26
Rolling cutter rock bits	
adequate air volumes . . . . .	4-21-22
attachment of threaded connections . . . . .	4-21
bearings . . . . .	4-17
control of drilling cost . . . . .	4-18
control of use of weight and rotary speed . . . . .	4-22-23
metallurgy . . . . .	4-17-18
selection of proper bit . . . . .	4-18-20
selection of proper nozzle size . . . . .	4-20-21
slow re-entry rate . . . . .	4-21
Rolling cutters . . . . .	4-23
Sand casting of maraging steels . . . . .	4-56-60
Seams	
imperfections in steel wires . . . . .	1-21-25
Severity curves of sheet metal parts . . . . .	2-14
Sheet metal parts	
biaxial stretch . . . . .	2-18
deep drawing . . . . .	2-15-16
die design . . . . .	2-16
electrochemical etching of grid . . . . .	2-11-12
mechanical properties . . . . .	2-14-15
severity curve . . . . .	2-14
strain analysis . . . . .	2-10-17
strain contours . . . . .	2-16-17
strain measurement . . . . .	2-12-13
Silicon effect on properties of Ti alloys . . . . .	1-49-50
Simulations in failure analysis . . . . .	2-35
Sintering emissivity of steel powder	
compacts . . . . .	2-37-42
Slivers	
imperfections in steel wires . . . . .	1-27-30
Solid solution strengthening	
in carburizing steels . . . . .	3-6-7
in steel sheets . . . . .	3-23-25
Solution annealing temperatures	
effect on properties of Ti alloys . . . . .	1-49-54
Stainless steels	
corrosion . . . . .	4-3-9
effect of abrasion . . . . .	4-8-9
intergranular corrosion . . . . .	4-6-7
pitting and crevice corrosion . . . . .	4-5-6
stress corrosion cracking . . . . .	4-7-8
Steel industry	
energy conservation . . . . .	2-1;
2-2	
use of coal . . . . .	2-3-5
Steel machinery parts	
hard-facing alloys for . . . . .	4-10-11
Steel wires	
characteristics of seams . . . . .	1-21-25
non-linear imperfections . . . . .	1-27-30
upset tests . . . . .	1-25-27
Steels	
dome height measurement . . . . .	3-55-59
forming limit curves . . . . .	3-57
influence of lateral drawing-in on	
stretchability . . . . .	3-54-61;
64	
transverse constraints . . . . .	3-59-60
use in oil and gas installations in North	
Sea . . . . .	2-8
Steels, specific types	
SAE 1017	
effect of carbide spheroidization on	
magnetic properties . . . . .	1-62-64
D6ac	
arrest temperature vs fracture	
toughness . . . . .	2-61-62
cooling curves . . . . .	2-81-82
effect of austenitizing temperature on	
quenching . . . . .	2-61
effect of quenching on fracture	
toughness . . . . .	2-59-64
for aerospace structures . . . . .	2-59-64
Strain	
measurement of sheet metal parts . . . . .	2-12-13
Strain analysis of sheet metal parts . . . . .	2-10-17
Strain contours of sheet metal parts . . . . .	2-16-17
Stress corrosion cracking of stainless steels . . . . .	4-7-8
Stress corrosion resistance of Al alloys . . . . .	2-22
Seams	
determined by influence of lateral	
drawing-in . . . . .	3-54-61;
64	
of Al alloys . . . . .	3-54-60
of brass . . . . .	3-54-60
of steels . . . . .	3-54-60
Superalloys	
application of hot tensile data to plant	
practice . . . . .	2-46-48
Gleeb hot tensile test . . . . .	2-43-46
hot working temperatures . . . . .	2-46-48
microstructure of fractured hot tensile	
specimens . . . . .	2-48-49
Superplastic alloys	
forming by internal pressure . . . . .	1-31-32
Surface discoloration of Ni alloy tubing . . . . .	2-51-54
Tempering of acicular ferrite steels . . . . .	3-50-52
Tensile properties of Ti alloys . . . . .	1-49-59
Thermomechanical aging of Al alloys . . . . .	2-24
Tin	
effect on creep of ferritic steels . . . . .	4-50-56
Titanium alloys, specific types	
Ti-6Al-2Sn-4Zr-2Mo-0.08Si	
creep . . . . .	1-50-54
effect of Si . . . . .	1-49-50
effect of solution annealing	
temperature . . . . .	1-49-54
microstructure . . . . .	1-51-54
tensile properties . . . . .	1-49-54
Ti-6Al-4V	
diffusion molding . . . . .	3-62-64
Transportation of fuel . . . . .	2-6-7;
	9-10
Transverse constraints	
effect on dome stretching . . . . .	3-59-60
Tubes and tubing for transporting fuels . . . . .	2-9-10
Tungsten carbide for extreme abrasion and	
cutting . . . . .	4-10-12
Tunneling . . . . .	4-24-25
Ultrasonic testing with a computer . . . . .	1-1-8
Upset tests in steel wires . . . . .	1-25-27
Vacuum brazing	
surface discoloration of Ni alloys . . . . .	2-51-54
Visual examination in failure analysis . . . . .	2-33-34
Wear . . . . .	1-39
of austenitic Mn steels . . . . .	4-32
Wear resistance of grinding balls . . . . .	4-44-45
Weldability	
of ferritic stainless steels . . . . .	3-38
of steel sheets . . . . .	3-17-19
Welds and welding failures . . . . .	1-35
X-ray diffraction	
in measurement of retained austenite . . . . .	1-55
X-ray techniques	
in failure analysis . . . . .	2-35
